

## **IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

ESTE INFORME CONTIENE INFORMACION IMPORTANTE ACERCA DE SU AGUA POTABLE.  
HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE  
ENTIENDA

### **The Monroeville Municipal Authority (MMA) Chlorine Disinfection Process \*\*September 16, 2019 through April 1, 2020\*\***

Beginning September 16, 2019, and continuing through April 1, 2020, the MMA's finished water supplier will be providing MMA customers with drinking water disinfected with chlorine instead of chloramines. The change is necessary to maintain the proper bacteriological quality of our drinking water.

While most customers will not notice any change in their water, some might notice a taste and odor of chlorine. The switch also means that kidney dialysis facilities or home dialysis units may need modifications depending on their method of chlorine removal. Home dialysis users should consult their physician or dialysis machine manufacturer for instructions. Fish owners should consult their local pet store for recommended products that will remove chlorine prior to use.

For information about chlorine and more, visit us online at [www.monroevillewater.org](http://www.monroevillewater.org) or contact our office at 412-372-2677.

**Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.**
